Khayyam High School and Pre-University Center

Tehran, Iran

---

## Language Skills

English (Fluent);

Persian (Fluent);

Chinese (Intermediate);

Arabic (Good at Reading Comprehension)

---

## Projects / Experiences

### BoostUp Space Group/Developed With HTML, Sass, ReactJS

May 2019 - Present

Link to Project: <https://www.beta.boostup.space>

**Description:** BoostUp is a space consultancy company which supports the execution of space projects in global scale.

I coded and built the UI/UX for BoostUp's new interface in collaboration with a Flask backend. For further convenience, we built a custom CMS for managing the data.

### BookRate Project/Developed With HTML, Sass, ReactJS

March 2019 - April 2019

Link to Project: <http://www.bookrate.matinnikookar.ir>

**Description:** I decided to develop this project in order to enhance my skills in web development, specially the best practices for Single Page Applications. This project is built as a template and the content is static.

### WikiHero Project/Developed With HTML, CSS, ReactJS

December 2018 - January 2019

Link to Project: <http://www.hero.matinnikookar.ir>

**Description:** Fluent work with APIs requires continuous practice. In order to achieve this, I decided to use SuperHeroAPI for my next project. This project is a one page application, developed using React Router Dom and is fully responsive. Users can look for a superhero and receive a considerable amount of data about the character's biography, appearance and power statistics.
